

Preference Sensitive Surgeries

Preference Sensitive Surgeries (PSS) are procedures aimed at treating health conditions for which there are two or more valid treatment alternatives and the choice of treatments involves tradeoffs that should be based on patients' preference.

Adenoidectomy/Tonsillectomy, Myringotomy, Sinus/Nasal/Diagnostic Surgery, Bladder Suspension, Breast Biopsy, mastectomy/Lumpectomy, Bunionectomy, Cataract, Cardiac Cath-Diagnostic, Angioplasty/Stent, Coronary Artery Bypass Graft, Lower Extremity Bypass, Carotid Endarterectomy, Cardiac Valve Procedures, Pacemaker/Defibrillator, Abdominal Aortic Aneurism, Bariatric Surgery, Cholecystectomy, Colon Resection, Colonoscopy & EGD, Cystoscopy, Groin Hernia, Laparoscopic Nissen, Hemorrhoidectomy, Appendectomy, Adhesion Lysis, Hysterectomy, D&C, Hysteroscopic Procedures, Tubal Ligation, Knee Arthroscopy, Knee Ligament Reconstruction, Knee Replacement, Bronchoscopy, Lung Surgery, Thoracoscopy, Prostate biopsy, Prostatectomy, General Shoulder Surgery, Shoulder Replacement, Spine Disk Replacement, Spine Fusion, Dorsal Column Stimulator, Carpal Tunnel, Hip Replacement, Hip Resurfacing, Vaginal/C-Section Delivery, Vasectomy/Vasovasostomy
